## **TrashMasters Sells Arizona Operations to Waste Management**

We are pleased to announce that on June 1, 2010 TrashMasters, LLC completed the divestiture of substantially all of the assets of its wholly-owned subsidiary TrashMasters Arizona, LLC to Waste Management of Arizona, Inc. Terms of the sale were not disclosed.

TrashMasters Arizona operated primarily in Pinal County where it performed commercial, industrial and residential collection and hauling through its Maricopa Disposal Services brand. “The addition of TrashMasters’ customers, combined with the employees’ commitment to customer service and safety, make this acquisition a perfect addition to our base of business” said Joe Cassin, Waste Management of Arizona’s Vice President of Business Development. “We are proud to be given the opportunity to increase our presence throughout Pinal County,” he said.

Corridor Capital, through its special purpose limited partnership, Corridor TrashMasters, L.P., had completed a leveraged buyout as the lead investor, joined by our partner SPB Partners, in TrashMasters Arizona in May of 2009.

Led by a team of industry veterans, TrashMasters, LLC maintains other solid waste hauling operations in the Western United States and is actively pursuing additional solid waste hauling acquisitions throughout the United States.
